AND LAND-GRANT COLLEGES

PREFACE

APPROPRIATIONS GROWTH MASKS FINANCIAL CRISIS FACING PUBLIC HIGHER EDUCATION

The National Association of State Universities and Land-Grant Colleges is proud to publish this ninth edition of Dr. M. M. Chambers' annual report on state tax appropriations for operating expenses of higher education. For nearly a decade now, Dr. Chambers has coordinated a nationwide network of volunteer correspondents devoted to the timely collection, and dissemination of useful data summarizing state support of higher education. Dr. Chambers' work during this period has filled in a major gap in the information available about public higher education. The dedication with which he has carried out this task has earned him the well-deserved appreciation of university and state officials throughout the country and of many others concerned with financing higher education,

Over the past nine years, Dr. Chambers has documented an unprecedented growth in state tax support for higher education. In 1959-60, a total of \$1.4 billion was appropriated by all 50 states for operating expenses of higher education. This year^ the total has surpassed \$5 billion; and the amount appropriated by California, New York, and Illinois together exceeds the entire 1959-60 national total.

These figures are impressive and reflect an important commitment on the part of the states to higher education. However, despite the large sums involved and the impressive percentage increases reported, public higher education still is not receiving the support it must have to keep up with rising costs and demands. In fact, although state tax support is rising in dollars, it has steadily declined as a percentage of total income for many public institutions. With growing competition from areas such as welfare, highway, and urban programs for state tax dollars, this proportion threatens to decline even more although dollar support will continue to grow. An understandable reluctance on the part of many legislatures to increase state taxes or modernize their tax systems puts further pressure on the already squeezed state tax dollar.

In short, despite the significant efforts made by the states, they have not been able financially to meet fully the even greater demands that have been placed on public colleges and universities. As a result, despite apparently large increases in appropriations, state and land-grant universities throughout the nation are faced with dangerous threats to their quality and to the educational opportunity they have long provided to the citizens of this country. Because of budget cuts, many of these institutions are being forced to postpone desirable expansion in certain programs, delay improvement or initiation of others, and consider steps which may limit their enrollments or raise the cost to students.

Facts such as these put the seemingly large increases reported by Dr. Chambers in a sobering perspective. To explore this perspective, the Office of Institutional Research of the National Association of State Universities and Land-Grant Colleges conducted a special survey of the Association's members. Responses were received from 61 of the Association's 100 member institutions in 41 states. Throughout all of the responses ran a warning that cannot much longer be ignored. A day of reckoning is rapidly approaching when it will be harder and harder to catch up and compensate for years of reduction, postponement, and in some cases, neglect.

State Universities Must Cope with Rising, Enrollments, Salaries, and Costs

The DIE survey sought the reasons behind growing university budget requests, three major areas – expansion, inflation, and salaries – stood out and were cited by nearly all responding institutions. Fewer institutions, but still a majority, also listed needs for new academic programs, research activities, service projects, and additional facilities. By and large, these latter areas appeared to have been subordinated to the demands of expanding enrollment, increasing salaries, and other rising costs.

Plans to increase faculty salaries by at least five and as much as 15 percent were reported by almost all universities, reflecting increased costs of living and the need to close the significant salary gap that still exists between public and private universities according to the most recent (1967-68) survey by the American Association of University Professors. Last year, public universities raised full professors' salaries an average of 7.3 percent. In spite of this increase, private universities are able to offer full professors an average of \$2,110 more per year in salary and \$3,281 more in compensation (i.e. salary plus specified fringe benefits). Public universities have often been forced to increase teaching loads to conserve limited funds for faculty salary increase. The ratio of undergraduates to regular faculty actually deteriorated in public universities during 1953-64 from 10.61 to 11.71, while it improved in private universities from 3.78 to 7.17, according to a recent study by Professors Young and Taylor of the University of Wisconsin. All but four of the institutions participating in the OIR survey requested additional funds to accommodate increased enrollments. They also requested funds to hire additional faculty and supporting staff to serve the new students.

Nearly all of the universities were hard-hit by inflation. The "University of Alaska, for example, noted that steel products have risen eight to 12 percent and library books six to 15 percent. Florida State University reported a 50 percent increase in freight costs on office furniture. FSU also reported that some types of electrical wire, particularly those containing copper, have increased 75 percent in cost. Office furniture prices increased five percent on July 1, the second such increase in two years, according to the University of Iowa. "Laboratory glassware has gone up' 20 percent in five years. Even our common fluorescent light tube is up 6.62 percent from last year,"¹¹ Iowa added. Kansas State University reported a 10-15 percent increase in construction costs. Oregon State University reported a ten percent increase in the average price of hardcover books and binding over a two year period. Many institutions mentioned higher postage rates.

Inadequate Financing Threatens Quality and Opportunity

Survey institutions were also asked to comment about the effect on their plans of failure to receive their full budget requests. Their answers emphasized the threat to quality and the threat to opportunity that inadequate state support is creating.

"The final appropriation of operating funds...fell considerably below the original request...(and) placed the University in a position of merely 'holding its own' rather than progressing in quality of education and service to the state," responded one major midwestern university. "The University was not forced to make specific curtailments, such as in enrollment, but a number of plans for doing a better job of what we do now had to be shelved," the institution continued. "However, a major reason why out-and-out curtailments were avoided was because tuition charges to students were increased..." the institution added.

Reported an institution in the South, "The failure to receive the full amount requested will simply result in a lower degree of service and the inability to make desired expansion and improvements in existing programs... Economies will be effected in certain areas so that there should be no dilution of the quality of the academic program, "but some highly desirable improvements cannot be funded."

The responding institutions produced many specific illustrations of the adverse effects of budget cuts on their development and on their states. Louisiana State University, for example, has been unable to offer curricula in the computer sciences, despite an urgent and growing need for highly trained personnel in state agencies, business, and industry. A post-graduate program to enable physicians to keep abreast of new developments in medicine, which has been operated with federal funds, will be phased out early next year because state funds have not been made available for its continuation. Like many other state universities, LSU also reported the loss of outstanding faculty members because of an inability to offer competitive salaries. The head of its department of chemical engineering left to accept a \$7,000 increase at a neighboring university. This individual was instrumental in attracting about \$1.5 million in research contracts and grants to LSU last year.

Elsewhere, the University of Montana reported that an honors program could not be instituted as planned. Colorado State University was able to hire only 24 of 70 needed additional faculty members. The University of Massachusetts eliminated educational television and reduced its 1969 summer program because of a lack of funds. A number of institutions reported deterioration in building maintenance funds. Still others reported overcrowding, growth in class size, and an inability to hire enough additional staff members to reduce growing student-faculty ratios.

Furthermore, in order to at least partially offset budget cuts, several institutions reluctantly announced increases in their tuition. As President James Fletcher of the University of Utah explained, "It is a poor choice, indeed, to decide between breaching the concept of public education by tuition increases and suffering a telling loss in institutional quality which makes the education received less than adequate." The University of Michigan reported a fee increase for the second consecutive year, adding that "loan funds and-scholarships cannot continually be increased to meet these demands."

Added Michigan, "Several consecutive years of inadequate appropriations are resulting in revising downward future enrollment projections." Several other universities raised the possibility of limiting enrollments and slowing down their growth. As public institutions, with a strong commitment to providing educational opportunity in their states, they each expressed a reluctance to do this. Several states noted inadequate expansion of new urban campuses operated by a number of state universities.

Facilities Needs Are Crucial

It is in this area of enrollment growth and expansion that the fate of university construction (capital) budget requests, which are not included in Dr. Chambers' report but which were included in the OIR survey, becomes crucial. As one university noted, "Because of the large cut in the University's capital budget request, present facilities will be taxed. Unless significant increases in capital appropriations are forthcoming, the University will be unable to accommodate projected student increases as well as its present level of research and service programs." The lack of response to capital requests is particularly critical because of the long leadtime needed to complete many building projects and also because of the pinch many institutions are feeling from recent cuts in Federal programs which had been providing substantial sums for college buildings.

In general, capital budget requests did not fare as well as operating requests. About one-quarter of the universities reported no capital appropriations in response to their requests. Only one out of nine got as much as 80 percent of the capital dollars it requested from state appropriations. Some two-thirds got substantially less than half of the appropriated capital funds they requested.

Those institutions reporting requests for bond authorizations received somewhat better support. About half of those requesting authorization for construction bond issues reported approval for the entire amount they sought. One even received more than requested – but the extra bond authorization was granted as an apparent substitute for outright appropriations.

Operating Budgets Lose One Out of Every Five Dollars Requested

Turning to operating expenses, in every single case, the state appropriation was less than the university request, with a median budget cut of 17 percent of the original request. This means that state universities this year are generally operating with only a little more than four out of every five dollars requested from state appropriations. Among the responding universities, this year's median appropriation increase is only 12 percent higher than last year's. This may seem adequate to some but state university requests are carefully reviewed and pared before they are ever presented, and each further reduction has a detrimental effect on the university's ability to carry out its mission.

Budget cuts came particularly from state governors and legislatures. Forty-three institutions in 27 states reported budget cuts by legislatures. Thirty institutions in 25 states reported cuts by governors. Twenty institutions in 19 states reported cuts by both governors and legislatures, with 15 institutions in as many states reporting that their legislatures subsequently restored at least some of the money eliminated by the governor. Ten institutions reported budget cuts by state budget or finance agencies; nine, by state coordinating higher education boards; and three, by boards of regents.

Although Dr. Chambers presents appropriations figures for two-year intervals, the OIR attempted to compare 1968-69 appropriations with figures reported for 1967-68. Using figures reported by Dr. Chambers for both years, the one-year increase in state appropriations was 15 percent. In about one-third of the states, the appropriation increase for all higher education was greater than the increase for the state or land-grant university, reflecting the demand for state tax funds from other segments of higher education, such as junior colleges, private higher education, and newly established institutions.

In sum, the 1968-69 report by Dr. Chambers, taken with the OIR's special survey, cautions against complacency about the significant gains reported in state tax appropriations for higher education. Our state governments have demonstrated an impressive commitment to higher education. As costs increase and demands on state universities continue to grow, state governments must not allow themselves to lose the momentum of their support. Only with regularly growing support from state governments can our state universities and other segments of public higher education succeed in carrying out the many activities that have become their responsibility and that have become so important to society today.

A Note to Users of This Report

Detailed information about the procedures used in compiling this report are

found in the appendix. We would like, however, to emphasize the following three points about the material contained in this booklet.

First, this report covets only appropriations of state tax funds for operating expenses of higher educational institutions. The Office of Institutional Research believes that these figures are a more valid measure of state support of higher education than total appropriations made by state legislatures since the latter may include reappropriated income received by institutions from student fees and other non-tax sources. The report does not include appropriations for buildings and other capital purposes.

Second, users of the data contained in this report should keep in mind that appropriations from state tax sources listed herein include support not only for instructional programs, but also for research, including agricultural and engineering experiment stations, and a great many public services such as general extension, county agricultural and home demonstration agents, adult education programs, hospitals, and other activities assigned by state legislatures to institutions of higher education.

And finally, the data contained in this report are in preliminary form and subject to verification and change. In several of the state tabulations the items may not add up to the indicated total. Minor discrepancies may be attributed to rounding. Where the discrepancies are substantial, the investigator, while reasonably confident of the total, may have encountered difficulty in obtaining from his sources consistent reports of such items as state scholarship programs, expenses of central governing boards, supplementary budget increases or decreases. To check and verify every item would be a costly and time-consuming project which would delay the publication of this report beyond the time when it is most useful. While the tabulations are subject to change, they provide a reasonably accurate picture of state tax funds appropriated for 1968-69.

INTRODUCTION

THE NEAR FUTURE OF PUBLIC HIGHER EDUCATION

This ninth edition of the annual summary of Appropriations of State Tax Funds for Operating Expenses of Higher Education records the total for the fifty states as approximately \$5 billion.

This total shows a rate of increase of 233 percent over the period of eight years 1961-1969. The facts of the national birth rate during the most recent twenty years, together with other factors affecting the demand for education beyond the high school, indicate that up to the year 1980 enrollments in higher education will probably increase at about the same rate as during the decade 1960-70 (doubling within ten years).

Children who will be ready for college in 1980 were born in 1962, and in 1968 were already six years old. The year of their birth was one in which only a slight decline had yet occurred from the all-time record number of births in 1957, the peak year of the prolonged postwar baby boom. Continued decline has occurred since 1962, and the year 1967 has been reported as showing the lowest birth rate in thirty years. This means some decline in the total number of births per year, which conceivably could have some effect on college attendance after 1980, but not before.

Meantime many powerful factors operate to push college enrollments upward. Among them are (1) the real and increasing necessity of some formal education beyond the high school, for breadwinning and for performance as a citizen in a complex society; (2) the rising general expectation that all, or nearly all, high school graduates will get some further education; (3) the tendency of increasing numbers of persons above "college age", including many mature women, to resume study which was interrupted in youth, to upgrade and update their earning power and their esthetic satisfactions; and (4) the strong trend toward longer stays in college or university, including graduate and professional schools.

Today only a little more than half of the annual crop of high school graduates go on immediately for further formal education. The percentage is somewhat more than fifty. This will rise to seventy-five or eighty-five or more. Even when it approaches one hundred it will fix no ceiling on college and university enrollments, on account of the factors mentioned in the foregoing paragraph, and others related to them.

Seventy percent of 1968 enrollments are in public universities and colleges; 30 percent in private institutions. The public sector will bear the brunt of continued increases. It is a difficult challenge to maintain and improve quality while large-scale expansion is doubling the numbers of students every ten years. This challenge has brought about, and will continue to require, large annual increases in tax support of higher education.

The private institutions, whose rate of enrollment growth is only about fifty percent every ten years (contrasted with one hundred percent in the public sector), are somewhat less overwhelmed with the sheer weight of numbers. It is not altogether surprising, then, that the record as compiled by the United States Office of Education and projected into the future shows that for more than ten years private colleges and universities have been able to spend more annually per student enrolled than the public institutions; and that the gap has steadily widened, and is expected to become even wider in the ensuing several years.

This appears in a simple tabulation:¹

EXPENDITURES FOR EDUCATIONAL AND GENERAL OPERATING EXPENSES, BY
PUBLIC AND PRIVATE COLLEGES AND UNIVERSITIES,
PER STUDENT PER YEAR,
IN SELECTED YEARS FROM 1955-56 TO 1965-66, PROJECTED TO 1975-76

Year	Public	Private
1955-56	\$1,280	\$1,189
1957-58	1,304	1,323
1959-60	1,411	1,507
1961-62	1,459	1,762
1963-64	1,509	1,943
1965-66	1,545	2,103
	Projected	
Year	Public	Private
1967-68	\$1,582	\$2,247
1969-70	1,613	2,326
1971-72	1,649	2,551
1973-74	1,658	2,668
1975-76	1,710	2,798

The growing disparities indicate that, insofar as quality in higher education can be measured (admittedly crudely) by expenditures for the instruction of one student for one year, the public colleges and universities are fast falling far behind, being outstripped by the private institutions, and being unable to maintain the nationwide average expenditure per student. Argument could go on at length as to whether this means the public institutions are in general more efficient in getting educational productivity for each dollar expended, or that their instruction and related services are generally of lower quality. Either conclusion would justify the need for swiftly augmented tax support of the public institutions. This seems likely to be forthcoming. It is within the capacity of the states to provide, without hardship, if they update their revenue systems. It will pay large dividends in economic growth, wise citizenship, and humane civilization.

*\$19,376 and \$19,646.

**Famed private institution predominantly for Negroes.

***Fifteen state junior colleges, presumably including the former Sneed Junior College (Methodist), which the legislature authorized the state to acquire.

ADDITIONAL IMPORTANT NOTES: Additional appropriations aggregating \$9 and 1/3 million for fiscal year 1967-68 and \$10 1/2 million for 1968-69 were made, "conditional upon the condition of the Alabama Special Educational Trust Fund and with the approval of the Governor, provided, however, in the release of the conditional appropriations herein made, the conditional appropriation to the State Board of Education for the use of the Minimum Program Account--Trainable Retarded Children and Vocational Education shall be paid in full before any other conditional appropriations are released."

(continued in next column)

(continued from preceding column - ALA.)

Another conditional appropriation of \$2 million each year was made to Auburn University "for the construction and equipping of a branch in Montgomery," and \$5 million in bond money was also appropriated for that purpose. The present Montgomery extension center of the University of Alabama will be phased out as the new Auburn University branch is developed.

So Regional Edn Fund	400
Bd Trustees of Insts H L	380
Technical Institutes	1,700
State aid to jr colleges	12,371
Total	95,609

* A lump-sum appropriation, not to any institution, but to be allocated to the institutions by the Board of Trustees of State Institutions of Higher Learning.

** Classified as "Research and Development Funds", aggregating \$12,988,000 for the biennium.

+ The Mississippi Research and Development Center is a non-degree-granting institution, with its program intimately related to those of the state universities.

In August 1968 the Board of Trustees of State Institutions of Higher Learning allocated a total of \$28,270,000 to ten institutions for fiscal year 1968-69 out of the "General Support" appropriation of \$52 million for the biennium 1968-70.

To afford an impression of the identity of the institutions, it is necessary to show both the amounts allocated to the 8 teaching institutions for (continued in next column)

(continued from preceding column - MISS.)

fiscal year 1968-69, and one-half of the amounts appropriated specifically by the legislature to the units and services associated with each institution. This allows subtotals for each of the state universities to emerge, which are presumably roughly comparable with those of similar institutions in other states.

Allocations to eight teaching institutions in Mississippi in August 1968 for fiscal year 1968-69, and one-half the appropriations for biennium 1968-70 to units and services associated with each institution, in thousands of dollars.

Institutions	Sums
U of Mississippi	\$5,132
U Miss Sch of Medicine	2,515
U Miss Teaching Hosp	2,505
U Ctr and Org Research	500
U Miss Sch of Nursing	290
Pharmaceutical research	157
Subtotal, U Miss-\$11,099	
Mississippi State U	6,095
Coop Ag Exten Service	2,266
Ag Experiment Sta	1,807
Chemical Regulatory	211
Forest products	144
Foundation herds	20
Subtotal, M St U-\$10,501	
U of Southern Mississippi	4,767
U So Miss Sch of Nursing	157
Subtotal, U So M-\$4,924	
Jackson State College	2,287
Miss St Coll for Women	1,837
Delta State College	1,804
Alcorn A&M College	1,626
Miss Valley State Coll	1,498

The total here is not material because not all allocations are included; allocations to independent research institutions are not included.

For the 50-state summary table for fiscal year 1968-69, the entry is one-half the total legislative appropriation for the biennium 1968-70, or \$47,801,000.

MISSOURI

State aid to county jr colls***	7,686
<u>Total</u>	<u>95,047</u>

* All units of the University, including \$5,642,193 for Agricultural Experiment Station.

** A first-time appropriation to provide scholarships and other programs to enable needy students to attend institutions of higher education.

*** The sum appropriated here appears smaller than its counterpart for the preceding fiscal year, 1967-68. This is due to the fact that the appropriations for 1967-68 and prior years were for operating expenses and capital outlays, unsegregated, while that for 1968-69 is for operating expenses only. There was also a 1967-68 appropriation of \$14½ million for state aid for capital expenditures of the county colleges.

NEW MEXICO

State tax-fund appropriations for operating expenses of higher education in New Mexico, fiscal year 1968-69, in thousands of dollars.

* Pennsylvanians insist that this is not a state university, but "state-related" because its governing board has only a minority of its members appointed by public authorities. It is, however, for all intents and purposes the principal state university in Pennsylvania, as its name implies.

** Appropriated to enable the university to reduce student fees without loss of operating income. Note that much larger sums for this same purpose are appropriated to the two "state-related" private universities--Temple and Pitt.

***Temple and Pitt are private corporations, with one-third of the members of their governing boards appointed by public authorities under statutes of 1965 and 1966. They are often grouped with Pennsylvania State University as "state-related", the three composing the "Commonwealth Segment" of higher education in Pennsylvania.

NOTE: An appropriation of \$1,581,692 to the Hahnemann Medical College failed to pass in the Senate prior to the break in the session in July 1968. It was thought that this appropriation might well be enacted after the legislature reconvened in September 1968; but the outcome could not be known when this report went to press in August.

RHODE ISLAND

+ Effective July 1, 1968, the Danville Branch of VPI and the Danville Technical Institute will be combined to form Danville Community College.

++ Effective September 1, 1967, the Va Associated Research Center was placed under the administration of the College of William and Mary.

**** See footnote @, above.

++++ Nine community colleges now in operation.

(continued on next page)

Additional Footnotes - VIRGINIA

NOTE: Effective July 1, 1968, Frederick College, a private 4-year college at Portsmouth, has been donated to the state and will become Frederick Community College. The donation included a cash gift of \$1 million to operate the institution for the next two years.

NOTE: The figures for "Empl fringe benefits" include employer costs of social security, retirement, and group life insurance. They are approximations, because exact calculations can not be made until the end of the fiscal year.

WASHINGTON

State tax-fund appropriations for operating expenses of higher education in Washington, biennium 1967-69, in thousands of dollars.

GRAND TOTAL	49,033

* This appropriation is the proceeds of an allocated tax of one cent per bottle on sales of soft drinks.

** At all the institutions, "registration fees" and "tuition fees" are charged to students. At West Virginia University and Marshall University, all these fees are held in institutional funds and used only for capital outlays. At all the other state colleges, "registration fees" are treated in the same manner, but "tuition fees" are turned into the general fund of the state. It is necessary to subtract all these fees in order to arrive at the net appropriation of state tax funds.

APPENDIX I

WHAT THE FIGURES ARE INTENDED TO MEAN

The data are supplied by key persons in each state who report them to the small monthly mimeographed newsletter GRAPEVINE. Their cooperation is indispensable. The ground-rules used to achieve an approach to uniformity of reporting are enumerated below. Diversities of practice among the fifty states make it impossible to eliminate all inconsistencies and accomplish absolute comparability among states and among institutions. We emphasize that comparisons are of limited usefulness, but have value if correctly interpreted.

- (1) We exclude appropriations for capital outlay.

(Nevertheless, GRAPEVINE appreciates informative statements and documentation regarding appropriations, bond issues, or other devices for providing capital funds. We can make occasional separate stories or exhibits of these, but never commingle or confuse them with appropriations for operating expenses).

- (2) We exclude any sums appropriated which clearly originated from sources other than state taxes, such as student fees or other institutional receipts. (Some states capture these non-tax funds for the state treasury, and appropriate them to the institutions as a part of the total appropriations for operating expenses; but many states do not. Hence, it is necessary to peel off the non-tax institutional receipts in order to report Appropriations of State Tax Funds).

- (3) We include any sums appropriated for the annual operating expenses of the institutions of higher education, even if appropriated to some other agency of the state for ultimate allocation and payment to the institutions. (Some states appropriate, either occasionally or habitually, sums for such items as faculty fringe benefits under conditions such that only the total made available at the time can be known, and the actual allocations to several institutions can not be known until after the end of the fiscal period. GRAPEVINE wants to report the total made available at the time of appropriation, and generally does not wait for subsequent institutional allocations unless they are obtainable without delay. GRAPEVINE'S thrust is the prompt reporting of appropriations; not later reporting of actual expenditures).

- (4) We include any pre-allocated state taxes whose proceeds are dedicated to any institution of higher education, bypassing the process of periodic appropriation by the legislature. (For example, West Virginia has a tax of approximately one cent per bottle on the sale of soft drinks, currently producing about \$4½ million per year, which automatically goes to the West Virginia University Medical Center without legislative appropriation).

- (5) We would like to include, whenever practicable, separate appropriations for medical centers (including schools of medicine, dentistry, nursing, teaching hospitals, and other appropriate appurtenances of a medical education complex); separate appropriations for agricultural experiment stations and cooperative agricultural extension services; and separate appropriations for branch institutions, regional campuses, and any other off-campus outposts of universities or land-grant institutions. We can not request this except in instances where it is easily practicable and would not involve delay in reporting.

(6) We include sums derived from state tax funds and appropriated for state scholarships. This is regardless of whether such scholarships are tenable in public or private institutions, or tenable within or without the state.

(7) We include sums appropriated to statewide governing or coordinating boards, regardless of whether for the expenses of the board or for ultimate allocation to the institutions.

APPENDIX II

LATE REPORT FOR PENNSYLVANIA

FOR FISCAL YEAR 1967-68

Pennsylvania's appropriations for fiscal year 1967-68 were made too late for inclusion in the 1967 edition of this document (preceding the present issue), and the report is consequently inserted here to complete the record.

PENNSYLVANIA

(continued from preceding column - PA.)
