association of state universities and land-grant
colleges

PREFACE

STATE APPROPRIATIONS FOR PRINCIPAL STATE UNIVERSITIES TRAIL OVERALL ALLOTMENTS FOR HIGHER EDUCATION

This year, as in the past, the National Association of State Universities and Land-Grant Colleges is pleased to publish the annual report by Dr. M. M. Chambers on state tax appropriations for operating expenses of higher education.

This marks the 12th consecutive year that Dr. Chambers has undertaken his comprehensive survey of state efforts to support higher education. His work has become nationally recognized as a vital aid in understanding the measure of state assistance to institutions of higher learning in this country.

Over the years, the "Chambers Report" has recorded a steady growth in tax assistance for higher education. This year, a gain is again reported but the current study also reveals a moderate slow-down in the percentage of gain in comparison with previous years.

State Universities Lag Behind

Moreover, the 1971-72 Chambers survey shows that state appropriations to the principal state universities across the nation have not kept pace with the rate of growth of increases in overall state allotments for higher education.

A comparison of appropriations for 1969-70 and for 1971-72 shows that of 97 major state universities which are surveyed in the new Chambers study, 71 received increases in appropriations which were less than increases for the state higher educational system as a whole.

A total of 12 major state universities received increased appropriations roughly equal to the increase in state allotments for the state's higher education system as a whole and 14 universities received increases in appropriations which were larger than those which went to the entire state-wide system.

With many states registering large increases in appropriations for community colleges and small, four-year schools, the question is raised of whether it is in the best interests of a state to finance other institutions at the expense of the firmly-established state universities and land-grant colleges which provide opportunities in higher education for 31 percent of all U.S. college students.

Standstill Appropriations

Taking into account the two factors of inflation and rising enrollment, the Office of Research and Information (ORI) of the National Association of State Universities and Land-Grant Colleges has calculated that a university must have an average annual increase of at least ten percent in its operating budget in order to simply maintain a status-quo in its level of services.

In order to assure the ten percent budget increase, state appropriations must also increase approximately ten percent annually, ORI estimates. State appropriations account for approximately half of the revenue available to state universities.

Yet 54 of 97 institutions which participated in the new Chambers survey reported increases in state appropriations over the two-year period from 1969-70 to 1971-72 of less than 10 percent per year.

Five state-assisted institutions—City University of New York, Washington State University, Southern Illinois University, Colorado State University and the University of Washington—received state appropriations for 1971-72 which were lower than those received for 1969-70.

The University of Washington, for example, received a state appropriation for 1971-72 which was 14 1/4 percent lower than the appropriation it received, for 1969*-70.

Colorado State University's 1971-72 state appropriation was 10 percent lower than in 1969-70; Southern Illinois University experienced a 5 1/2 percent drop for the same period; the Washington state University appropriation was down 4 1/4 percent from 1969-70 and City University of New York was 2 2/3 percent lower in state allotments .

Universities Make Drastic Cuts

Decreases in state appropriations have forced affected institutions to make drastic cuts in staff, maintenance, student services and other university activities.

Faced with the earlier reported reduction in state appropriations, Colorado State University announced a cut of 75 staff members, a reduction in maintenance and library acquisitions and the phase-out of several minor sports.

Like other institutions in similar circumstances, however, Colorado State reported its faculty morale was high and that an effort was being made to do the best job possible with available funds.

Washington State University had to trim \$3 million from its budget as a result of cuts made by the legislature to balance the state's budget. One immediate effect of the cut was the loss of 171 teaching positions. The university noted that the reduction means the faculty will give less attention to individual students, classes will be larger and some courses will not be offered.

New pressures also were created at universities where state appropriations did not keep pace percentagewise with increases in state appropriations for higher education overall.

The University of California reported a gain in state appropriations of 1 3/4 percent, for example, whereas the overall state appropriations for higher education increased 14 percent. The University of California anticipates a four percent increase in its 147,279 student enrollment by the end of 1972 while the faculty will have to be trimmed by two percent.

The final state appropriation for the University of California was \$335,982,000, although the university had requested \$404,000,000, not including capital outlay.

The university reported that since 1966-67, total state support has fallen substantially behind the growth in state general fund revenue and California personal income.

Anticipated state support for medical schools, opened in response to California's need for large numbers of additional physicians and health professionals at Davis, San Diego and Irvine, failed to materialize and the university's efforts in this area were stymied.

In addition, more than \$50 million in matching federal funds—funds which rightfully belong to Californians—have been irrevocably lost over the past four years because the state did not allocate its share.

The effects of the budget cuts in California include a worsening of the overcrowding in classrooms, a sharp rise in student-faculty ratios, a curtailment in academic programs and a cut of more than 500 teachers, researchers and staff personnel.

In a report to the Regents of the University of California, President Charles J. Hitch declared: "I can assure you it will be next to impossible to improve undergraduate education under this budget."

Statistics Tell Story

A glance at some statistics graphically demonstrates the percentage gap between appropriations for other principal state universities and for state higher' education overall.

The gain in appropriations for the University of Illinois was 4 percent while the state gain for higher education was 16 percent. At Purdue a gain of 17 3/4 percent still trailed behind a state-wide gain in appropriations for higher education of 30 1/2 percent. South Carolina State College showed an increase of 13 1/2 percent compared to 40 1/2 percent state-wide. Georgia Institute of Technology received an appropriations' increase of 12 percent. The state increase in appropriations for higher education was 31 1/4 percent.

Colorado State University's ten percent appropriations decline came during a period when all higher education appropriations in Colorado grew by 30 1/4 percent.

The impact of this gap between appropriations for the established state universities and for higher education overall across a state is illustrated in the situation at Miami University in Oxford, Ohio.

Dr. Philip R. Shriver, president of Miami, declared:

"Our actual additional money in state support is less than the rate of inflation. The extra money needed just to hold the line is coming from the new student fees which went into effect in September. . . . Although it appears that higher education has gained 22 percent in state subsidy, Miami's Central Campus has gained only about 3 percent. There is no gain for the second year of the 1971-73 biennium."

Universities Lose in Fight for Tax Dollars

A four percent increase in the Iowa State University budget for 1971-72 was more than offset by fixed and inflationary costs. Over the past two years state appropriations have increased only about six percent each year, on the average.

President W. Robert Parks of Iowa State commented that the state's public universities are financially undersupported.

"As other pressures on the Iowa tax dollar have become greater," Dr. Parks said, "the needs of state universities have seemingly been given less consideration.

"Today, there is a growing need for the state of Iowa to take a more over-all view in arranging its priorities of public needs."

Michigan State University received an increase of 9 1/2 percent in its state appropriation while the statewide gain for higher education was 24 3/4 percent.

The final \$65.3 million appropriation for Michigan State fails to provide any state support whatsoever for 1,000 students enrolled at the institution since it was based on an enrollment figure of 41,500. The university identified a need based on actual enrollments exceeding 42,500.

Dr. Clifton R. Wharton, Jr., president of Michigan State, declared that the final budget "is based on the university's gross fee revenues, failing to take into account our policy of providing full or partial refunds to students who drop courses within a specified period. Consequently, the appropriation level assumes our income will be about \$1.5 million higher than it actually will be."

Gaps in Requests and Allocations

Cutbacks at other universities have been forced as a result of wide differences between budget requests and actual allotments.

Auburn University, for example, requested \$36.8 million for operating costs at its Auburn and Montgomery, Ala., campuses. The request was based on a report of a state Education Study Commission. Auburn actually received \$22.8 million in state appropriations.

The University of Michigan requested \$95.6 million and, received \$78.3 million, Emphasizing rising enrollments and costs. Indiana University requested \$96.96 million in operating costs for 1971-72 and \$115.8 million in 1972-73. The university received \$84.9 million for 1971-72 and \$86.3 million for 1972-73. The University of Minnesota requested \$125,164,083 for 1971-72 and received \$103,6 million.

Coping with Shortages

In efforts to try to bring expenditures in line with appropriations, many state universities have tightened budgets, cut back sharply on hiring additional staff and on instituting new programs, halted acquisitions of new equipment, let plant maintenance go by the boards and chopped research funds.

At the University of Iowa? President Millard Boyd imposed an internal "tax" of five percent on every department in the university.

The "tax," in effect, was a budget-cutting device under which each university department was forced to get by on five percent less money than it had in the preceding year.

The move by President Boyd meant increasing work loads for faculty members, a cutback on services, elimination of some jobs, shutting down buildings and programs.

President Boyd acted after the University's \$267 million budget request was cut to \$205 million in the Iowa Legislature.

State University of New York Chancellor Ernest Boyer acted swiftly to cut expenditures following the turndown by New York voters of a special bond issue and the freezing of most state funds.

Chancellor Boyer issued directives to the effect that no vacancies at the university would be filled, no out-of-state trips for university personnel were authorized, no new contracts would be awarded and no new equipment purchases for new construction would be made.

The resultant critical shortage of personnel forced SUNY at Albany to cut back its Computing Center personnel by 50 percent. This move made it necessary to refuse access to the computer for some 1,300 students in 26 courses.

Students Pay the Bill

Backgrounding the financial squeeze gripping many of the nation's public universities is the unfortunate fact that it is the student who bears the burden. As the costs of getting a college education go up, the prices charged to students and their families also rise. Eighty-four of the 99 major state universities participating in the Association's 1971-72 survey of students charges increased charges in at least one category.

The University of New Hampshire, which already charges the highest in-state tuition and required fees of any state university, was forced to consider another tuition hike to make up for a shortage of \$2.2 million in its biennial budget for 1971-73. The state of New Hampshire appropriated \$20.9 million for operating funds at the university during the 1969-71 biennium. For the 1971-73 biennium? the appropriation amounted to \$18.7 million. The state of New Hampshire ranks 50th in per capita appropriations for operating expenses of higher education.

For the University of New Hampshire to remain a quality institution, tuition increases of from \$400 to \$503 by 1973 are anticipated by University President Thomas N. Bonner.

Data on total student costs for the 1965-66 and 1971-72 academic years show that resident costs have risen an average of slightly more than six percent annually at public institutions of higher education.

Non-resident costs have increased at the alarming rate of nine percent annually during the same years.

Low Tuition Principle Endangered

Students and their families have been required to pay an increasing proportion of the cost of higher education in addition to increases based on inflation and rising costs. A recent OKI survey showed that resident students now pay a median 27.6 percent of instructional costs. The traditional level has been 25 percent.

Russell I. Thackrey, former executive director of the National Association of State Universities and Land-Grant Colleges, points out;

"It is as if our society were saying to its young people: We know that the future of all of us depends on your developing your talents to the maximum. But if you want to do this through advanced education, you must foot the bill."

At a time when 70 percent of all college students are enrolled in public institutions of higher education, including community colleges, it is ironic that the low tuition principle should be threatened.

The demands on the state tax dollar, so long the financial foundation for public higher education, today are intense. And so are the demands on public colleges and universities.

Yet these are the institutions which are at the very heart of the struggle to deal effectively with the urgent educational and social problems of the Seventies. As impressive as the gains in state support have been, there still is a need for additional assistance—now, more than ever—if these institutions which have made so many contributions to the nation are to maintain their effectiveness and continue to serve young Americans.

A Note to Users of This Report

Detailed information about the procedures used in compiling this report are found in the appendix. We would like, however, to emphasize the following three points about the material contained in this booklet.

First, this report covers only appropriations of state tax funds for operating expenses of higher educational institutions. The Office of Research and Information believes that these figures are a more valid measure of state support of higher education than total appropriations made by state legislatures since the latter may include re-appropriated income received by institutions from student fees and other non-tax sources. The report does not include appropriations for buildings and other capital purposes.

Second, users of the data contained in this report should keep in mind that appropriations from state tax sources listed herein include support not only for instructional programs, but also for research, including agricultural and engineering experiment stations, and a great many public services such as general extension, county agricultural and home demonstration agents, adult education programs, hospitals, and other activities assigned by state legislatures to institutions of higher education.

And finally, the data contained in this report are in preliminary form and subject to verification and change. In several of the state tabulations the items may not add up to the indicated total. Minor discrepancies may be attributed to rounding. Where the discrepancies are substantial, the investigator, while reasonably confident of the total, may have encountered difficulty in obtaining from his sources consistent reports of such items as state scholarship programs, expenses of central governing boards, supplementary budget increases or decreases. To check and verify every item would be a costly and time-consuming project which would delay the publication of this report beyond the time when it is most useful. While the tabulations are subject to change, they provide a reasonably accurate picture of state tax funds appropriated for 1971-72.

INTRODUCTION THE CURVE

CONTINUES UPWARD

This twelfth consecutive annual summary of appropriations of state tax funds for operating expenses of higher education shows a fifty-state total of \$7.7 billion, being a two-year gain of 24-1/4 per cent over the \$6.2 billion appropriated for fiscal year 1969-70, two years earlier.

This exhibits a moderate slowing down of the percentage of gain in comparison with the earlier years since 1965. During that period the percentages of increase over periods of two years were in the vicinity of 40. The present 24-1/4 per cent is, however, somewhat higher than the comparable percentages that prevailed during the first half of the nineteen sixties.

The curve continues to rise, but the rate of increase is not as tremendous as it was from 1965 to 1970.

No Watershed

Since the beginning of this decade there has been much erroneous talk and poorly documented publication to the effect that the year 1970 marked a supreme summit and a great "watershed" in the enrollments and state tax support of higher education in the United States. The unfounded implication is that the nineteen seventies will be a time of drastic leveling down of enrollments and of leveling off of financial support.

That panicky outlook is so patently contrary to the easily visible facts that it seems scarcely short of foolish. No one can deny that the national population of college age will continue to rise until 1980, when persons aged 18-24 will number more than 29 million. No one could fail to notice that a great and universal upsurge of rising expectations is in progress, creating new concepts of entitlement to educational opportunity.

Soundly based and strongly growing is the nationwide sentiment that the right of access to formal schooling up to as high a level as ability and ambition justify for the benefit of each citizen and of society shall not be withheld from any person because of economic deprivation, or discrimination on account of race, sex, religion, national origin or other irrelevant reason. A formal pronouncement of the President of the United States has set full accomplishment of this beneficent policy as a goal for the national centennial year 1976, right in the middle of the nineteen seventies.

A little thought given to the statistics of population, school and college enrollments, and public finances, should demonstrate that at the beginning of this decade we are far from being at any summit, but are actually only about half way up the hill, so far as the enrollments and financing of public higher education are concerned.

Confidence Is Justified

There is much idle talk that the recent wave of student militancy has destroyed the confidence of the public in higher education and that public colleges and universities must now look forward to years of austerity and cutback. This is very unlikely. Deep down, the great majority of citizens and legislators want the states to be generous in support of education. In large part, their suspicions regarding the financial management of colleges and universities are vastly exaggerated by some persons, as well as actually without basis.

Terry Sanford, former governor of North Carolina, now president of Duke University, said in his recent book on state government: "In at least one activity, it is undisputed that over the years the money from the states has achieved excellence. That is public higher education."! He made clear that public higher education is one activity of the state in which every citizen has a direct or potential interest.

There is also among the general public a feeling of long standing, especially in such states as Michigan, Minnesota, California, and other-states where the state universities have their autonomy safeguarded in the state constitutions, that higher education is a function so unique, so different from other governmental functions, that its management cannot properly be wholly integrated into a monolithic state bureaucracy in which ultimate administrative authority is centralized in the state executive office. A less rigid structure and style of governance is appropriate for a system of centers of higher learning.

Progress Among the States

Persons who wish to examine the figures in this present document at great length will find much that is informative regarding comparisons among states and institutions. It is always necessary to keep in mind that diversities in practices among the states make such comparisons of only limited usefulness; that the reduction of the nationwide scene to a semblance of uniformity inevitably does some violence to the actual facts at many points.

Without using space for extended analysis, a few of the more obvious among the changes of 1971-72 are merely hinted at here. Fourteen states showed rates of gain of 16 per cent or less over the two years 1970-72. Of these fourteen, ten were in the same lowest quartile of ten-year rate of gain 1962-72, showing ten-year rates of gain of 225 per cent or less. Thus these ten may be said to have performed proportionately at about their usual level. The four exceptions are Illinois, 16 per cent; California, 14 per cent; Pennsylvania, 9-1/2 per cent; and Rhode Island, 5-1/4 per cent. The first two have governors who have declared austerity for higher education; the last two are in the Northeast, where the tradition of state support is not as old and not always as potent as elsewhere.

Thirteen states were in the top quartile of two-year gains, achieving from 36 per cent to 64 per cent over the two years 1970-72. Of these, seven were in the same top quartile of ten-year gains, showing ten-year rates of gain of 450 per cent or more. These seven, then, were relatively in about their customary places. Three others were at the edge of this group, showing ten-year gains of 419 per cent or more, and moved up in their accustomed places a little during the two years 1970-72. The remaining three of the thirteen were Mississippi, 62 per cent; Alabama, 45 per cent; and Louisiana, 41 per cent. These three were all in the middle or lower quartiles of ten-year rates of gain, and thus made substantial acceleration of pace for 1970-72. The manifest moral is that these Southern states are catching up.

Four states are at the median rate of two-year gains (26 per cent). These are Kentucky, Nevada, Utah, and West Virginia. This is slightly above the figure for the two-year weighted average (24-1/4 per cent), which happens to be the figure for Michigan.

The Outlook

In view of many favorable factors, any current temporary slowdown in the financing of public higher education cannot be regarded as a crossing of a summit on a trail which thereafter leads only downward. The trail leads upward for another ten years:

Terry Sanford, *Storm Over the States*, at pp. 63-64. New York: McGraw-Hill Book Company, 1967. 218 pp.

- (1) Continued increase in numbers of persons aged 18-24.
- (2) Markedly rising expectations of women, and of economically deprived persons, and of members of racial and national minority groups, hitherto unjustly discriminated against.
- (3) Increasing necessity and popularity of return to college by adults.
- (4) Growing indispensability of advanced education as technology advances.
- (5) Firm place of education as a keystone of the American Dream.
- (6) Long-standing and persistent confidence in higher education.
- (7) Colleges and universities now having unprecedented disposition to adapt flexibly to the present needs of new and larger constituencies.
- (8) Trend toward improved financial management and toward interinstitutional cooperation.
- (9) Inevitable larger federal participation in the financing of higher education.
- (10) Inescapable necessity of elevating the general level of education, including provision for greatly enlarging the supply of scientists and humanists for future generations.

The table above shows how much of its tax funds each state is spending, per capita, for the operating expenses of higher education in 1971-72. The information was compiled by The Chronicle of Higher Education from figures supplied by M. M. Chambers of Illinois State University and from the U.S. Bureau of the Census's provisional estimate of each state's civilian population as of July 1, 1971.

ALABAMA

State tax-fund appropriations for operating expenses of higher education in Alabama, fiscal year 1971-72, in thousands of dollars.

Institutions	Sums appropriated	
(1)	(2)	
U of Alabama		
Tuscaloosa Main Campus	\$16,097	
Birmingham Campus	14,599	
Huntsville Campus	3,454	
Subtotal, U of Ala -	\$34,151	
Auburn University		
Auburn Main Campus	21,409	
Montgomery Campus	1,480	
Subtotal, Auburn U -	\$22,889

Coord Bd of Adv Edu & Accred	25
Subsidy to U Vt Medical Sch	125
Seven voc-tech colleges*	5,177
Total	25,870

* The vocational-technical colleges were until recently fewer in number, smaller in size, and not as largely post-high-school as now. Hence they were not included in these annual tabulations prior to 1971. Thus it is impossible to compute the two-year gain from available data. The statewide total for fiscal year 1971-72 is estimated to be a gain of about six per cent over the comparable figure for fiscal year 1969-70, two years ago.

NEW JERSEY

State tax-fund appropriations for operating expenses of higher education in New Jersey, fiscal year 1971-72, in thousands of dollars.

- * \$80,946 and \$82,891.
- ** \$22,068 and \$23,221.
- *** \$7,500 and \$7,900.
- @ \$2,680 and \$2,680.
- + State-affiliated university, receiving full state subsidy for graduate programs and subsidy for lower division students equivalent to that of a community college.
- ++ Received a special additional grant because of inability to raise student fee charges in September 1971 under the wage-price freeze.
- +++ The appropriation law authorized the Board of Regents to arrange a subsidy to Case Western Reserve University, a private university, for education in dentistry as well as in medicine.
- # The appropriation law authorized a one-time grant to the Ohio College Library Center, a consortium of public and private colleges and universities in Ohio, to pay part of the initial expenses of computer cataloging for all member institutions.

(W.VA. footnotes continued on following page)

(continued from preceding page - W.VA.)

- ** Includes \$5,300,000 estimated proceeds of an allocated tax on sales of soft drinks.
- + Scholarship program \$300,000; Veterinary Tuition \$40,200; Awareness Program \$50,000.
- ++ Research and demonstration in agriculture and forestry, community development, etc.
- +++ At the state colleges (but not at West Virginia University and Marshall University), student fees go to the State General Fund; hence must be subtracted to arrive at the net state tax-fund appropriation.

WISCONSIN

State tax-fund appropriations for operating expenses of higher education in Wisconsin, fiscal years 1971-72 and 1972-73, in thousands of dollars.

Institutions	Sums appropriated	
	1971-72	1972-73
(1)	(2)	(3)
U of Wisconsin (all branches & units)*	\$129,912	\$144,268
Wisconsin State U's (collectively)	72,832	82,501
Vocational, Technical & Adult ed system**	15,526	22,775
County Teachers Colls+	755	-0-
Med Coll of Wis++	1,877	1,877
Higher Ed Aids Bd@	4,501	5,822
Totals	226,403	257,243

* Allocations of appropriated funds to the several campuses of the University of Wisconsin, and to the several Wisconsin State Universities, had not been made when this document went to press.

The University of Wisconsin and the Wisconsin State University System were merged by Chapter 100, Laws of 1971, which abolished the two boards of regents and supplanted them with a new single board of regents, and abolished the Coordinating Council. During the biennium 1971-73 the two systems will continue to operate independently, while a legislative implementation committee devises further steps to complete the merger in January 1973.

** This embraces Wisconsin's unique system of Vocational, Technical, and Adult Schools, which enroll increasing proportions of high school graduates along with others who are not high school graduates, and some of which offer courses transferable to four-year institutions for as much as two years of credits.

(continued from preceding column - WIS.)

- + It is not expected that the County Teachers Colleges will receive any further state support after the end of fiscal year 1971-72.
- ++ This is the former Marquette University School of Medicine, formerly ineligible for any state support because it was a denominational institution. It is now legally a separate independent non-profit charitable corporation (nonsectarian) receiving state assistance as indicated. The state aid is \$4,500 per year per medical student enrolled.
- @ The Higher Educational Aids Board provides scholarships for selected students attending private colleges in Wisconsin; operates programs for disadvantaged students and also provides the state subsidy for student loans to students in both public and private institutions. It has not been included in GRAPEVINE's tabulations for previous years. Hence its presence in this table causes the apparent percentages of gain over earlier years to be slightly overstated.

WYOMING

State tax-fund appropriations for operating expenses of higher education in Wyoming, biennium 1971-73, in thousands of dollars.

Institutions	Sums appropriated	
	(1)	(2)
U of Wyoming*		\$29,874
State aid to jr colls		6,759
Total		36,633

* Appropriations are now made in a lump sum with no designated amounts for Agricultural Extension, retirement costs, or scholarships and loans.

APPENDIX I

WHAT THE FIGURES ARE INTENDED TO MEAN

The data are supplied by key persons in each state who report them to the small monthly mimeographed newsletter GRAPEVINE. Their cooperation is indispensable. The ground-rules used to achieve an approach to uniformity of reporting are enumerated below. Diversities of practice among the fifty states make it impossible to eliminate all inconsistencies and accomplish absolute comparability among states and among institutions. We emphasize that comparisons are of limited usefulness, but have value if correctly interpreted.

(1) We exclude appropriations for capital outlay.

(Nevertheless, GRAPEVINE appreciates informative statements and documentation regarding appropriations, bond issues, or other devices for providing capital funds. We can make occasional separate stories or exhibits of these, but never commingle or confuse them with appropriations for operating expenses.)

(2) We exclude any sums appropriated which clearly originated from sources other than state taxes, such as student fees or other institutional receipts. (Some states capture these non-tax funds for the state treasury, and appropriate them to the institutions as a part of the total appropriations for operating expenses; but many states do not. Hence, it is necessary to peel off the non-tax institutional receipts in order to report Appropriations of State Tax Funds.)

(3) We include any sums appropriated for the annual operating expenses of the institutions of higher education, even if appropriated to some other agency of the state for ultimate allocation and payment to the institutions. (Some states appropriate, either occasionally or habitually, sums for such items as faculty fringe benefits under conditions such that only the total made available at the time can be known, and the actual allocations to several institutions cannot be known until after the end of the fiscal period. GRAPEVINE wants to report the total made available at the time of appropriation, and generally does not wait for subsequent institutional allocations unless they are obtainable without delay. GRAPEVINE's thrust is the prompt reporting of appropriations; not later reporting of actual expenditures.)

(4) We include any pre-allocated state taxes whose proceeds are dedicated to any institution of higher education, bypassing the process of periodic appropriation by the legislature. (For example, West Virginia has a tax of approximately one cent per bottle on the sale of soft drinks, currently producing about \$4.5 million per year, which automatically goes to the West Virginia University Medical Center without legislative appropriation.)

(5) We would like to include, whenever practicable, separate appropriations for medical centers (including schools of medicine, dentistry, nursing, teaching hospitals, and other appropriate appurtenances of a medical education complex); separate appropriations for agricultural experiment stations and cooperative agricultural extension services; and separate appropriations for branch institutions, regional campuses, and any other off-campus outposts of universities or land-grant institutions. We cannot request this except in instances where it is easily practicable and would not involve delay in reporting.

(6) We include sums derived from state tax funds and appropriated for state scholarships. This is regardless of whether such scholarships are tenable in public or private institutions, or tenable within or without the state.

(7) We include sums appropriated to statewide governing or coordinating boards regardless of whether for the expenses of the board or for ultimate allocation to the institutions.

APPENDIX II

LATE REPORT FOR PENNSYLVANIA

For Fiscal Year 1970-71

Pennsylvania's complete appropriations for fiscal year 1970-71 were made too late for inclusion in the 1970 edition of this document (preceding the present issue), and the report is consequently inserted here to complete the record.

State tax-fund appropriations for operating expenses of higher education in Pennsylvania, fiscal year 1970-71, in thousands of dollars.

<u>Institutions</u>	<u>Sums appropriated</u>
(1)	(2)
State-related U's -	
Pennsylvania State U	\$69,163
Temple University	41,392
U of Pittsburgh	37,899
<u>Subtotal, s-r u's - \$148,454</u>	
State-owned Institutions -	
Indiana U of Pa	8,006
West Chester St Coll	7,256
Edinboro State Coll	6,260
California St Coll	6,080
Slippery Rock St Coll	5,908
Millersville St Coll	5,341
Clarion St Coll	5,309
Shippensburg St Coll	4,963
Kutztown St Coll	4,910
Bloomsburg St Coll	4,722
Mansfield St Coll	4,142
East Stroudsburg St Coll	3,826
Cheyney State College	3,316
Lock Haven St College	2,978
<u>Subtotal, s-o i's - \$73,018</u>	
Community colleges	11,500
Private insts, state-aided -	
U of Pennsylvania	12,000
Thomas Jefferson U	2,487
Drexel University	2,427
Hahnemann Medical Coll	1,582
Phil Coll of Osteopathic Med	1,343
Lincoln University	850
Medical Coll of Pa*	846
Phila College of Art	299
Phila Coll of Textiles & Sci	210
