

Online School Leadership Training

Every school has leadership that results in improved student performance — and leadership begins with an effective school principal.

SREB *Challenge to Lead* Goals for Education

Engaging Leaders in Solving Real School Problems

Training That's Trusted

SREB offers training for principals and other educational leaders who guide the professional development of teachers to improve school and classroom practices and advance student achievement. Based on SREB's Critical Success Factors, the SREB School Leadership courses are rooted in educational leadership research and integrate real-world problems to build knowledge and skills in instructional leadership.

Training That Meets Your Needs

Face-to-face and online learning opportunities are available for your school, district, university or state. Facilitated learning can be customized to incorporate your initiatives and your schedule. Courses are built around clear objectives and key strategies that help you achieve your goals. Participants can enroll in courses as individuals or as school teams.

Training That Results in Student Achievement

SREB's professional development courses focus on what principals and school leaders must know and be able to do to improve instruction and raise student achievement. Together, they form a coherent curriculum encompassing preparation, development and support of principals and teacher leaders; optimization of the learning environment for students and adults; and improvement in instructional practices that engage and motivate students.
