

**University Research Grant Program: Faculty Fellowship Program
College of Education Guidelines and Application Materials
2017-2018**

Program Goal

Illinois State University defines research as “a formal procedure which contributes to the expansion of basic knowledge or applies such knowledge to the solution of problems in society or exemplifies creative expression in a specific field of study. The results of research must be communicated to professionals outside the University through a peer review process in a manner appropriate to the discipline” (University Research Grant Program University-Wide Guidelines, approved 2005).

Award Purposes

The College of Education University Research Grant (URG) Program is designed to:

1. Encourage and support research in the College,
2. Stimulate development and submission of external grant proposals, and
3. Support development of the research agendas of pre-tenured faculty along with moving research agendas forward for tenured faculty that are important to the discipline.

Maximum Awards

Research Fellowship / External Grant Development is available up to \$5,000 per principal investigator (PI), not to exceed two PIs and \$10,000; first-year faculty are eligible for an additional \$1,000 on years when mid-year funding is not available to first-year faculty

When funding is available, the College of Education will provide first-year faculty the opportunity to receive a First Year Faculty Mid-Year Research Fellowship in the amount of \$2,000. Applications must be submitted to the Chair or Director of the Department/School, and then submitted to the Associate Dean in the College of Education.

Eligibility

Research Fellowship / External Grant Development. Tenured and tenure-track faculty

First-Year Faculty Mid-Year Research Fellowship. First-year tenure-track faculty

Note: Except for the First-Year Faculty Mid-Year Fellowships, pre-tenured faculty proposals will be evaluated along with senior (tenured) faculty proposals. When more applications are submitted than can be funded, new faculty who submit proposals are eligible for up to 75% of the URG funds set aside for the Research Fellowship and External Grant Development grants. Senior faculty proposals are eligible for up to 25% of the funds. The proportions may be altered based on the actual number of faculty who submit proposals in each category. Joint proposals submitted by tenured and pre-tenured faculty will be considered in the pre-tenured faculty pool of funds.

Limitations

- No project that is already funded by other sources is eligible for submission.
- Faculty members may submit only one Research Fellowship/External Grant Development

proposal per year.

- Faculty members who receive a Research Fellowship or External Grant Development grant are not eligible for any URG award the following year.
- For every three Research Fellowship grants received, faculty must submit an external grant through RSP to be eligible to apply for another Research Fellowship grant.
- External Grant Development awards are limited to grants not yet developed and are limited to development of external grants with a budget request of at least \$150,000.
- Faculty receiving an External Grant Development grant must submit an application for an external, competitive grant through the Office of Research and Sponsored Programs to be eligible to apply for any other URG.
- URG recipients not remaining at the University through the academic year of the Research Fellowship / External Grant Development grant must resign the grant and return all monies to the Office of the Dean, College of Education.
- Funds must be spent before June 30th for the fiscal year awarded. For example, a faculty member applies for URG funding in March 2025. CRC announces the awards in May 2025. The award recipient must spend the funds between September 2025 and June 30, 2026 (FY26).

First-year faculty are allowed to apply for the first year faculty grant at any time during the year up to the date advertised, pending available funds.

Accountability

Outcomes of the URG-funded activities, including all scholarly results of work funded by the grant, are reported on the *Professional Outcome Form*. These forms are submitted in the two fiscal years following the award and are due to the Associate Dean for Partnerships, Grants, Graduate Programs, and International Opportunities by October 1 in each of the 2 years following the award.

Outcomes in the External Grant Development category must include a submission of an external grant for year 1. If the grant is funded, the outcome for year 2 will summarize the progress of the external grant. If the grant is not funded, the outcome for year 2 will indicate how the grant was revised and resubmitted to the same agency or submitted elsewhere.

Failure to report the professional outcomes by the due dates will result in all investigators involved in the URG-funded project becoming ineligible for future URG competitions for a period of five years.

URG Life Cycle for sample FY 2025

September 2023	URG funds available, pending funding from the University
September 2023	College of Education distributes URG guidelines via website
March 2024	Faculty submit URG applications to Department Chairs/School
April 2024	Department Chairs submit URG Research Fellowship grant applications to the College
May 2024	URG Research Fellowship and External Grant Development recipients are announced

September 2024 URG funds available, pending funding from the University
 October 2025 Professional Outcome reports for funded URG projects are due to the College
 October 2026 Professional Outcome reports for funded URG projects are due to the College

Please see website for more specific, current URG dates:
http://education.illinoisstate.edu/faculty_staff/research/support/urg.php

Components of the URG Proposal

PROPOSAL COMPONENT	CONTENT
Cover Page	
General Information	Complete the information for type of award; PI/Co-PI names; tenure status; and other information regarding salary & payment schedule.
Project Title and Dates	Provide a descriptive title that concisely captures the intent of the project. Provide the project beginning and end dates.
Total Amount Requested	The total amount requested may not exceed the maximum amount for the specific type of award (FY/EGD/1Y).
Project Abstract	Provide a 250-word abstract that summarizes the purpose, goal and/or research questions and the intended project activities and outcomes.
Approved IRB Protocol	If the intended research involves the participation of human subjects, IRB approval must be obtained for the project for which funds are being requested. If the proposed project has been approved at the time of submission, please provide the approved IRB protocol number. If the project is under department, school, or IRB review, please indicate this. Funds will not be released until final project IRB approval has been received.
Signatures	The proposal must include the PI and School Director/Department Chair signatures, as well as any Co-PI signature, affirming that the project is not otherwise supported by another grant; that the required professional outcome forms will be submitted; and that failure to do so renders the PI and Co-PI ineligible for URG funding for a period of five years.
Project Narrative (5 page maximum)	
Project Title	Provide a descriptive title that concisely captures the intent of the project.
Purpose	Explain what the study is about and state your research question(s). Explain how the research questions are tied to the study's purpose and how it will add to the literature as described in your literature review. Explain how your study's results will affect the intended population. Summarize all key aspects of the study within the purpose (details are included in subsequent sections).
Purpose/RFP overview [External Grant Development only]	Explain the purpose of the study, include research questions, and potential impact. In addition, for External Grant Development, adequately describe RFP, funding agency, amount requested, and deadline for submission (link or attach current or past RFP instructions, if future RFP not available yet). Grants must be over \$150,000.

Literature Review	<p>Describe how your project is connected to research or theory in your field.</p> <p>Identify, for your reader, the gap in existing research that your study intends to fill, including both seminal research affecting your line of inquiry/research question(s), and up-to-date research. Describe the theory, theoretical concepts or research paradigm, research-based models, or practical rationale through which the outcomes of the study will be interpreted.</p> <p>Note: Use “Author” or “Author, et al” when referring to your own work or that of you and colleagues so as to permit a blind evaluation of the proposal.</p>
Methodology	<p>Describe the project, participants, research design, setting, procedures, etc. and provide a rationale for the methodology, techniques or modes of inquiry.</p> <p>Describe and justify the kinds of data your chosen methodology and tools & procedures (e.g., data sources, evidence, objects, interviews, surveys, standardized assessments, criterion referenced assessments, databases, images, documents, etc.) will generate to answer your research question/s and why these data sources are appropriate to the proposed project/research question(s).</p> <p>Describe your data analysis approach(es) and how they will be used to analyze data sources. Explain the appropriateness/ utility of your data analysis approach(es) in terms of the anticipated results that your analysis techniques are expected to yield.</p>
Detailed Budget	<p>Provide a detailed statement of the personnel (faculty salary, civil service hours, graduate assistant, or student help) or the operation costs (contractual, travel for data collection, commodities, printing, postage, equipment, computer software or services). For each budget item for which funds are requested provide the estimated cost bases (e.g., hours and rate of pay).</p> <p>Note: Faculty may request URG dollars for travel to collect and analyze data, but not for dissemination of findings. Funds to support External Grant Development may be used to meet with Program Officers, collaborators, or research site.</p> <p>Note: No URG money can be spent on incentives, stipends, or food for participants. Incentives are considered gifts, which are not allowable with URG money.</p> <p>Note: Requests for mobile or computing devices under \$750 must be reviewed with the Associate Dean for Partnerships, Grants, Graduate Programs, and International Opportunities <u>prior to</u> submission.</p>
Budget Narrative	<p>Provide an explanation of how each item supports the proposed research or scholarship activities. Explicitly link each budget item/expenditure to the project’s goals in the justification of that item in the narrative. Provide a clear justification for using grant funds for faculty salary.</p> <p>Note: The College Research Committee may recommend budget adjustments.</p>

<p>Professional Outcomes & Dissemination</p>	<p>Describe your anticipated professional outcomes for years 1 and 2. In projecting outcomes, applicants should include results likely to occur within two years from the date of the award. The anticipated professional outcomes must be realistic yet consistent with the highest academic standards for scholarly productivity and may include (but are not limited to) presentations, publications, manuscript submissions, external grant proposal submissions, grant resubmissions, or other recognized scholarly outcomes.</p> <p>Note: The <i>actual</i> outcomes of the RF & 1Y URG-funded activities are reported on <i>Professional Outcome Forms</i> submitted at the end of Year 01 and 02. The outcome forms are due on October 1 in each of the two years following the award and identify all scholarly results of work funded by the grant.</p> <p>Note:</p>
<p>References</p>	<p>Provide a complete reference list.</p> <p>Note: Use “Author” or “Author, et al” when referring to your own work or that of you and colleagues so as to permit a blind evaluation of the proposal.</p>

Proposal Evaluation

URGs receive an initial formative review and feedback at the department or school level prior to submission to the College Research Committee (submitted by Department/School Chair/Director). The department or school forwards complete submissions to the College Research Committee according to the timelines provided. The College Research Committee will evaluate each URG proposal using a blind-review process to make the final decision regarding the URG awards. For additional details regarding the evaluation criteria, beyond the content required for each component as described above, see the document titled “*COE URG Proposal Evaluation.*”
